

EDUCATION

Bachelor of Computer Engineering, Major in Game Technology

Electronic Engineering Polytechnic Institute of Surabaya (2020 - 2024)
GPA 3.67 (Cumlaude)

SKILLS

- Programming (Python, C++, C#, Unreal Blueprint)
- Data Analysis and Visualization
- Mobile App Development (Figma, Swift)
- Game Design and Development
- AI and Machine Learning

KENAN FIRMANSYAH

SOFTWARE ENGINEER | GAME DEVELOPER

A dedicated and versatile tech enthusiast with a passion for innovation and a strong foundation in game programming, data science, mobile app development, and backend scripting.

EXPERIENCES AND PROJECTS

Game Developer

Agate | 2026 Feb - 2026 May

- Contributed to an unannounced game project as a Game Developer.

Apple Developer (Learner)

Apple Developer Academy | 2025 Feb - 2025 Dec

- Selected for an intensive program focused on app development, design thinking, and interdisciplinary collaboration.
- Gained hands-on experience in user research, UI/UX design, prototyping, and iterative testing.
- Worked in diverse teams to identify real-world problems and build impactful app-based solutions.
- **Won 1st Place at iPlay Apple Developer Academy Game Jam 2025**

Port & Release Game to iOS

Freelance (Milky Ice Jump) | 2025 Oct

- QA Test iOS build on Unity
- Implement Ad system for iOS version ([App Store Link](#))

Game QA + Technical Support

Ecosoft Interactive | 2025 April - 2025 June

- Reviewed builds and identified critical bugs, providing feedback to the team.
- Assisted in optimizing and preparing the game for iOS release, smoother performance, and UI adaptation.
- Facilitated better communication between designers and programmers to align game feel and production timelines.

Game Developer (Unreal Engine)

Starpixel Studios | 2024 Oct - 2025 April

- Leading Developer in Multiplayer Horror Project
- Used Blueprint extensively, with occasional C++ integration for performance-critical systems
- Delivered weekly builds, managed bug tracking, and provided internal documentation

ADDITIONAL EXPERIENCES & PROJECTS

1 GAME DEVELOPMENT

Saturated (Underwater Psychological Horror)

JoyBait Studio | 2025 Oct - 2025 Dec

- Play a role as the Project Manager and Programmer keeping track of the status of the game.
- Released on Mac App Store for Mac Silicon ([App Store Link](#))

Xanthous (Thesis: AI in VR Horror Game)

Electronic Engineering Polytechnic Institute of Surabaya | 2023 Feb - 2024 July

- Developed AI systems and game mechanics using Unreal Engine.
- Create immersive gameplay experiences for horror game enthusiasts.

2 PUBLICATIONS

Adaptive Radio System Using MetaSounds for Serious VR Game

IEEE Access (Volume: 13) | Nov 2, 2025

DOI: 10.1109/ACCESS.2025.3627544

Real Time Procedural Audio for Immersive Gameplay with MetaSounds

TCCE 2025, Trends in Computational and Cognitive Engineering | 2025

Dynamic Level of Difficulties Using Q-Learning and Fuzzy Logic

IEEE Access (Volume: 12) | Sep 12, 2024

DOI: 10.1109/ACCESS.2024.3457801

Enhancing Serious Game Experience Through In-Game Radio Using Context-Aware Recommender System Based on Player Behavior

INASS International Journal of Intelligent Engineering and Systems | Sep 2, 2024

DOI: 10.22266/ijies2024.1031.26

Dynamic Day and Night Cycle Impact in a Serious VR Game

ICVR 2024, International Conference on Virtual Reality | 2024

3 OTHER DEVELOPMENT

Indonesia Game Island 2026

JoyBait Studio Booth | Jan 23-25, 2026

- Logistics & Community Manager for game expo at Ciputra World Surabaya
- Showcasing Tales of Tula and Saturated at the booth

Home Server

Personal Project | 2023 Oct - 2023 Dec

- Designed and implemented a multifunctional home server serving as a Network-Attached Storage (NAS), a database server, and a computing server.
- Utilized Proxmox for server operating systems, showcasing proficiency in Linux-based systems.
