

KENAN FIRMANSYAH

BACKEND & SOFTWARE DEVELOPER

Software developer with experience across backend services, self-hosted infrastructure, and data engineering. Comfortable across the stack from Node.js services and Redis-backed systems to Proxmox/Docker hypervisor work, with a research background applying Python and ML to production problems.

EXPERIENCE

Game Developer

Agate | 2026 Feb - 2026 May

- Software engineering on an unannounced commercial project at one of Indonesia's largest game studios.

Apple Developer Academy @ BINUS (Alum)

2025 Feb - 2025 Dec, Bali

- 10-month intensive in product engineering: API design, networking, prototyping, iterative testing in interdisciplinary teams.

Lead Developer (Unreal Engine, C++)

Starpixel Studios | 2024 Oct - 2025 April

- Designed and shipped multiplayer networking systems for a real-time horror title.
- Wrote C++ for performance-critical paths; managed build, bug-tracking, and internal docs.

Data Scientist (Intern)

PT. eBdesk | 2023, 6 months

- Built Python data pipelines for scraping, analysis, and visualization (Selenium, Gephi, Tableau, Jupyter).

EDUCATION

Bachelor of Computer Engineering, Major in Game Technology

Electronic Engineering Polytechnic Institute of Surabaya (2020 - 2024)
GPA 3.67 (Cumlaude)

TECH STACK

Languages

- C++, Python, JavaScript (Node.js)

Backend & Data

- Node.js, Redis, Jupyter Notebook

DevOps & Infrastructure

- Docker, Dokploy, Proxmox, Linux

Engines

- Unity (C#), Unreal (C++ / Blueprint)

SELECTED PROJECTS & ADDITIONAL WORK

1 BACKEND, INFRASTRUCTURE & TOOLING

Home Server (Personal Infrastructure)

2023 Oct - 2023 Dec | Proxmox, Docker, Linux

- Designed and operated a multi-purpose self-hosted server: NAS, database server, and compute node.
- Proxmox-based virtualization with Linux guests; containerized services via Docker.

Findect — iOS Backend Developer

Apple Developer Academy cohort project | 2025 | Team of 6

- Built backend services for an LLM-powered professional networking app; matching and discovery layer.

Agreely — Software House & Freelance Platform (On-going)

Web / App stack, team of 3

- Founding contributor on a freelance-marketplace platform; covers full-stack engineering and ops.

Paid — Sport Split Bill

Apple Developer Academy cohort project | 2025 | 8+ weeks, team of 3

- Organizer-side cost & payment manager for recurring group activities; backend logic for splitting, tracking, and reconciliation.

2 APPLIED RESEARCH & DATA

Five peer-reviewed publications in IEEE Access, IJIES, ICVR, and TCCE on adaptive systems, reinforcement learning (Q-Learning + fuzzy logic), and context-aware recommender systems. Built on Python, Jupyter, and engine-side C++ for evaluation harnesses. *F1 up to 0.71; +35% session length* on the DDA paper.

3 SHIPPED SOFTWARE & GAMES

Saturated (Mac App Store, Apple Silicon) — Programmer & Project Manager, JoyBait Studio.

Milky Ice Jump (iOS App Store) — Freelance iOS port + ad integration.

Xanthous (Thesis, EEPIS) — AI-driven VR horror in Unreal, 2023-2024.

9+ Game Jams across Unity, Unreal, and multiplayer stacks (Photon networking) — recurring roles as gameplay programmer, AI programmer, and solo dev.
